Smart Lock

User Manual

C11

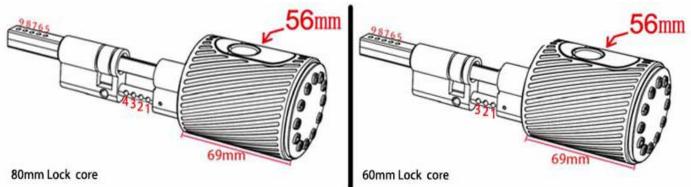

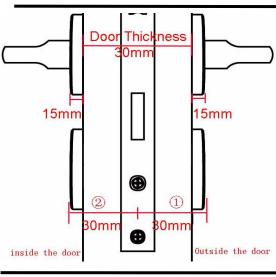

Special Attention:

- 1. Mechanical keys please keep outdoor, just in case keys lock in doors.
- 2. Please replace for the battery when low wattage alarm.
- 3.Reading this manual carefully before installation, and keep it for future reference.

1.Introduction

1.1.Adjust the cylinder to perfectly match your door and escutcheon.

As shown in the figure: the door thickness is 30mm, and the panel thickness is 15mm,The distance of each compartment on the lock core is 5mm

1 :Total thickness(distance from cylinder hole center to front panel)

(2) :Total thickness(distance from cylinder hole center to back panel)

1	Outdoor Cylinder length	2	Indoor Cylinder length	
30mm	1	30mm	5	
35mm	2	35mm	6	60mm
40mm	3	40mm	7	
45mm	/	45mm	8	
40mm	1	40mm	5	
45mm	2	45mm	6	80mm
50mm	3	50mm	7	
55mm	4	55mm	8	

Reset button

 $\displaystyle \bigcirc$ Check the following drawing to check whether the package contains all the parts

3.4.6. e-Key management

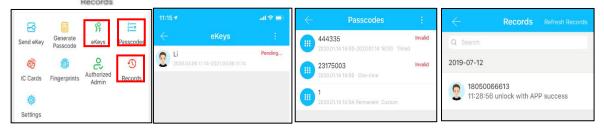

Click " \prod_{ekeys} " The manager can delete ekey, reset ekey, send and adjust the ekey, meanwhile he can search the lock record.

3.4.7. Passcode management

Click " All generated passwords can be viewed and managed in the password management module. This includes a password change, password deletion, password reset, and password unlock record.

3.4.8.Unlock records

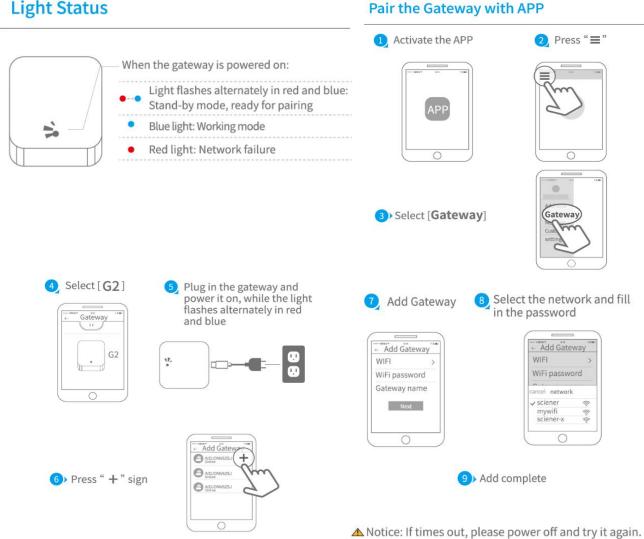

Click " 🥙 "you can query your unlock record as shown in figure

3.5. Gateway management(Optional)

The TT lock is directly connected via Bluetooth, that is why it is not attacked by the network. The gateway is a bridge between smart locks and home WIFI networks. Through the gateway, the user can remotely view and calibrate the lock clock, read the unlock record. Meanwhile, it can remotely delete and modify the password.

3.5.1. Add Gateway Light Status

3.5.2. Manual

After a short period of time, you can see which locks are in their coverage in the app. Once the lock is bound to the gateway, the lock can be managed through the gateway

4.FAQ

1) How to read operation records?	In the Records of the main interface
2) Why can't I unlock it after open the passage mode	You need to perform an unlock verification in any method, than the passage mode will take effect.
3) What is the purpose of Auto Lock	You can set how long to lock after unlocking
4) After installation, touch sensing keyboard, screen no respond	 a) In this case, first check that the positive and negative electrodes of the battery have been installed upside down, whether the battery has enough power b) Remove the back panel and see if it's connected. c) To eliminate the above situation, you need to remove the lock ,check whether the wires of the lock body are squeezed, and the re-wire.
5) Unable to register fingerprint	Check the fingers for dirt or wear, check the fingerprint head on the lock for dirt and oil stains, etc. Check to see if the fingerprint is working properly(Press to see if there is any responds.
6) What is the reason why the smart lock consumes fast power?	a) Large standby power consumptionb) Short circuit
7) There is no response to pressing the handle on outside the door, and there is unlock normally on inside the door, but the verification is normal, and the motor is normal.	It may be the triangle direction on the clutch was error, please check correction.
8) How many times will the passcode be locked? How long is it locked?	Enter the wrong password more than 5 times in a row, the keyboard is locked for 5 mins, Other ways to can open the door
