The manufacturer is not responsible for any damage or loss of data resulting from the use of the device.</p>	<p><b>INSTALLATION</b></p> <p>Check the power supply voltage before connecting the device to the power supply. The power supply voltage must be within the range of 100V to 240V AC, 50/60 Hz. The device must be connected to a grounded power supply. The device must be connected to a power supply with a maximum current of 10A. The device must be connected to a power supply with a maximum power of 2400W. The device must be connected to a power supply with a maximum voltage of 240V AC. The device must be connected to a power supply with a maximum frequency of 60 Hz. The device must be connected to a power supply with a maximum phase of 1 phase. The device must be connected to a power supply with a maximum type of 1 phase. The device must be connected to a power supply with a maximum voltage of 240V AC. The device must be connected to a power supply with a maximum frequency of 60 Hz. The device must be connected to a power supply with a maximum phase of 1 phase. The device must be connected to a power supply with a maximum type of 1 phase.</p>	<p><b>OPERATION</b></p> <p>Check the power supply voltage before connecting the device to the power supply.
