

TrackerHome

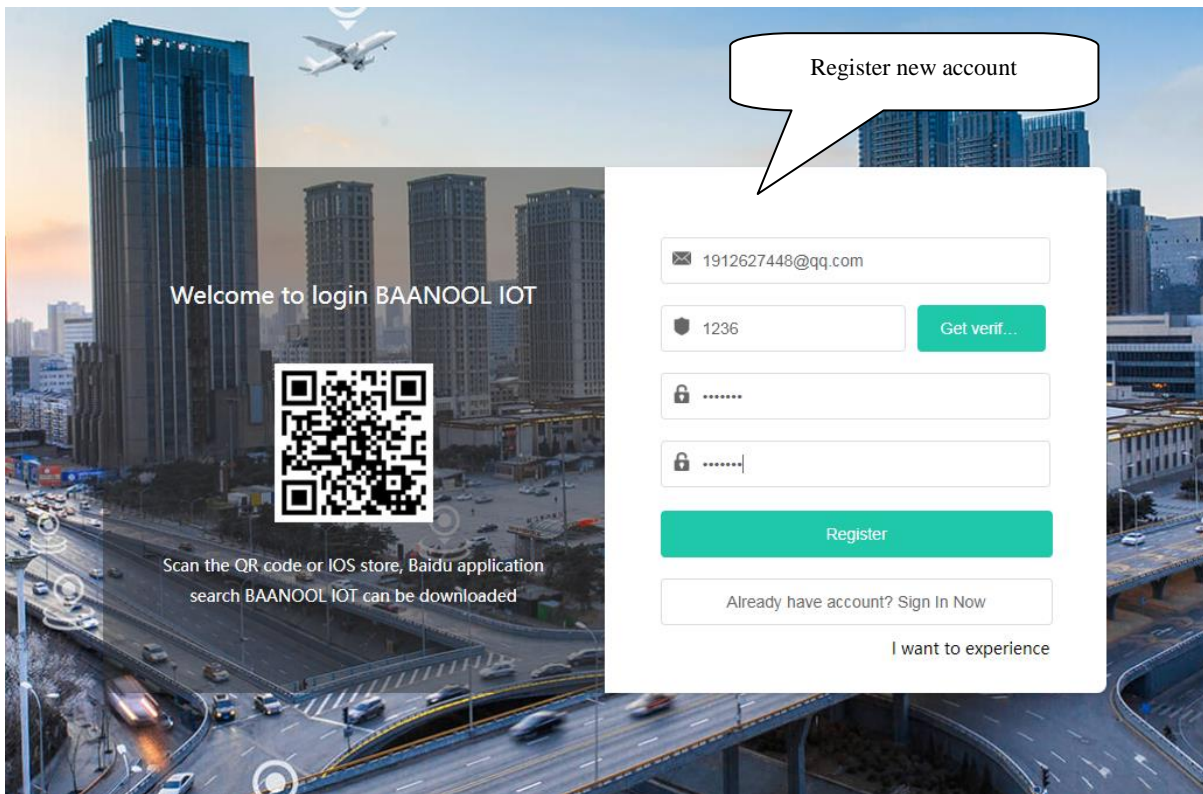

Platform Migration Instructions

1. REGISTER ACCOUNT AT NEW PLATFORM

- ① New platform website: <http://www.baanoooliot.com/>

② Fill in email and password

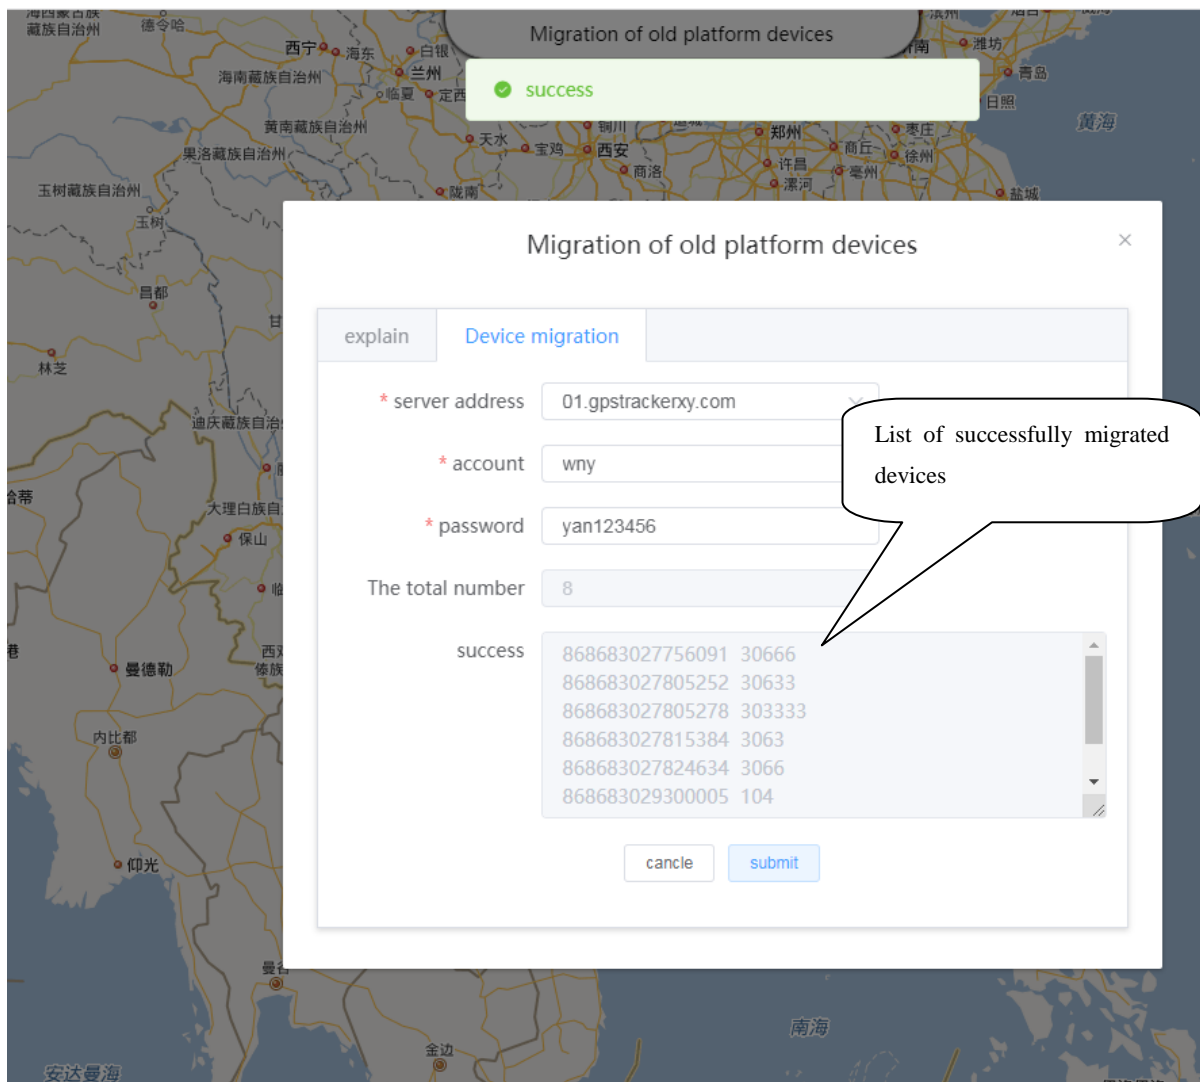

③ Register successfully, and log in to the platform to enter the main page

- ④ Select the server in TrackerHome you used before and fill in the account information

The image shows a 'Migration of old platform devices' dialog box overlaid on a map of China. The dialog box has a title bar with a close button. Below the title bar are three tabs: 'explain', 'Device migration' (which is selected and highlighted in blue), and an unlabeled tab. A callout bubble points to the 'Device migration' tab with the text 'Choose server'. Below the tabs are three input fields, each with a red asterisk indicating it is required. The first field is labeled '* server address' and contains a dropdown menu with '01.gpstrackerxy.com' selected. The second field is labeled '* account' and contains the text 'wny'. A callout bubble points to this field with the text 'Input account in TrackerHome'. The third field is labeled '* password' and contains the text 'yan123456'. A callout bubble points to this field with the text 'Input password in TrackerHome'. Below these fields is a field labeled 'The total number' which is empty. Below that is a large empty box labeled 'success'. At the bottom of the dialog box are two buttons: 'cancel' and 'submit'.

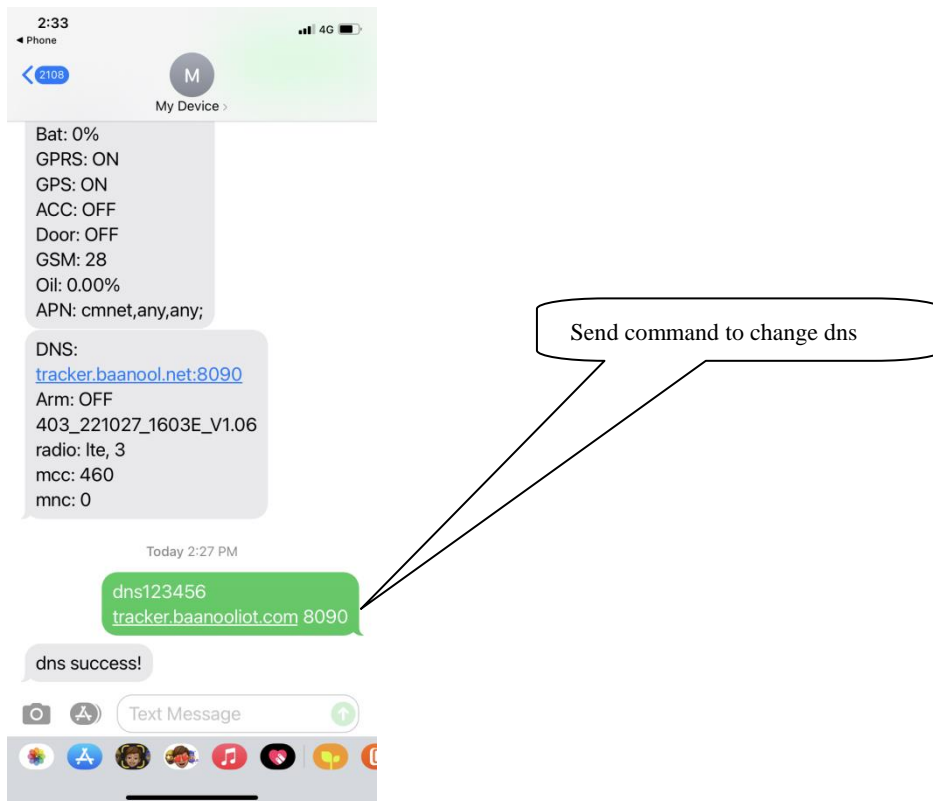

Click “submit”, and you will see the device number and device name that have been successfully migrated

2. SEND SMS COMMAND TO SET DNS OF THE NEW PLATFORM

Command : dns+password+space+tracker.baanooliot.com+space+8090

e.g : dns123456 tracker.baanooliot.com 8090

If there is any problem with the operation, please contact us by email : clw@baanool.com
